## Take on a new challenge with Sudoku

The latest way to give your memory a boost has arrived from Japan. It's called Sudoku, and like the crossword puzzle, it involves filling rows and columns — only here, you use numbers from 1 to 9.

### How to play

To play Sudoku, fill in the grid so that every row, every column, and every 3x3 box contains the digits 1 through 9 — without repeating or leaving out any digits. You could be playing like a pro in no time.
